2. Citations and explanations (Rule 70.7)

Document 1: JP, 3-48143, A (Toshiba Automation Co., Ltd.), 1 March, 1991 (01.03.91)

Document 2: Microfilm of the specification and drawings annexed to the written application of Japanese Utility Model Application No. 21101/1983 (Laid-open No. 127298/1984) (Hoya Glass Works, Ltd.), 27 August, 1984 (27.08.84)

The subject matter of claim 1 does not appear to involve an inventive step in view of document 1 (especially note "magazine 16") and document 2 (especially note "contact member 6" and "contact member 9") respectively cited in the ISR.

Document 1 does not describe a door, but it is a well-known technique to install a door for accommodating articles. So, a person skilled in the art could have easily (1) installed a door in front of the magazine described in document 1 and (2) installed the contact members described in document 2 on the door.

The drug case in the subject matters of claims 2-6, in which the door consists of a first door member positioned outside and a second door member positioned inside, wherein the second door member is used as a means for arraying drugs, is neither described in any of the documents cited in the ISR nor obvious to a person skilled in the art.
